

As a global provider of respiratory related services Vitalograph has undertaken clinical trials for many of the world's foremost pharmaceutical companies, biotechs and CROs.

With a 50 year heritage of service in the respiratory field, and through our experienced team of professionals, we bring an enduring commitment to excellence to all our clinical trial services.

These services include:

- Project management
- Data management
- Protocol review
- Customization of software and manuals
- Custom reports
- Web portals
- Site visits
- Global 24/7 support in multiple languages
- Shipping, installation and training at sites
- Translations
- Training at investigator and monitor meetings plus specialist training as required
- QA review and Data Management
- Integration to e-CRF systems optional
- Dedicated secure study servers with remote mirror servers for live back-ups.

Vitalograph specialises in respiratory clinical trials requiring electronic data capture (EDC).

Where EDC is not required we offer a range of respiratory diagnostic devices to suit every application including PC based spirometry systems, hand-held storage spirometers or desktop spirometers with data storage or paper records for manual entry into CRFs.
